

1. What's about UI?

In HuyakSoft we don't know anything about UI/UX development. See?  
That's user's panel:

Name:	<input type="text" value="oops"/>	Cash:	<input type="text" value="123"/>
<ul style="list-style-type: none"><li>• id: 0 company: Apple , cash: 100  <input type="button" value="Add"/> <input type="button" value="Edit"/> <input type="button" value="Del"/></li></ul>			

2. What does this app?

- A. Wastes your time.
- B. Spends Mongolab's server area.
- C. So, you can add, delete and edit some companies in that tree.
- D. That's all.

More [about](#).

3. What means "Tree" in the name of app?

Tree is an wide-used structure of data, so task was recognized by authors as something like.

4. What about system requirements?

- A. To develop this app, we used ES6, that's means what all browsers with update point after 2015 can allow it to run.
- B. You must wait end of previous operation before start new.
- C. App exists in two versions: v.0.3.2 – ready-to use beta with main functions, and v.0.3.2.1 – experimental alpha. Be careful with it to avoid your computer's explosion.

5. How I can start to use?

Just click here for [0.3.2](#) or here for [0.3.2.1](#)
